

# ethanol! the good fuel...

**ETHANOL  
IS GOOD FOR  
YOUR CAR**

A 10% ethanol blend (E10) in petrol has been approved for use in Australia. E10 costs you less to fill up your car and increases your octane rating.

## E10 IS GOOD FOR YOUR CAR

- An ethanol blended fuel keeps your cars fuel system clean.
- Commonwealth trials of E10 in the Australian fleet confirmed ethanol as a proven reliable fuel.
- **Shell, ExxonMobil, Chevron and BP in the United States support ethanol blended fuels, they are in fact, amongst the largest buyers of fuel ethanol in the world.**
- Over one trillion kilometres will be driven in the United States on Ethanol blended fuel in 2004.
- Over 30% of petrol sold in the United States contains Ethanol.

**ETHANOL  
IS GOOD  
FOR YOUR  
HEALTH**

## E10 IS GOOD FOR YOUR FAMILY'S HEALTH

- Up to one fifth of all lung cancer in the United States is caused by air pollution with tailpipe emissions contributing significantly to this. (Journal of American Medical Association).
- Ethanol blended fuel reduces toxic tailpipe emissions such as carbon monoxide by up to 30%.

**ETHANOL  
IS GOOD FOR  
AUSTRALIA**

## E10 IS GOOD FOR AUSTRALIA

- Ethanol is produced from renewable Australian crops, unlike petrol produced from crude oil.
- Ethanol fuel improves Australia's balance of payments by displacing imported foreign fuel.
- The Government policy is to produce 350 million litres of renewable fuels annually by 2010 leading to 2,300 construction jobs and 1,100 permanent jobs in regional Australian communities.
- The NRMA supports the use of renewable fuels such as ethanol.
